

## **Iran-Syria-Turkey-Iraq power network to be formed**

Tehran Times Economic Desk

TEHRAN – Iran's energy minister here on Saturday announced that a quadripartite electricity network will be formed among Iran, Syria, Iraq, and Turkey.

IRNA quoted Parviz Fattah as saying that the energy ministers of the four countries will soon hold a meeting in this regard in Baghdad.

With the power generating capacity of 120,000 MW, the four countries are considered as powerful countries in the world in the field of generating energy.

Fattah went on saying that Iran is establishing two thermal power plants in Iraq one with the neighboring country's investment and the other one as a joint venture.

Construction of Syria's Tashrin power plant is another project underway by Iran that has been invested by Syria
