

Oman: Municipal projects in Al Wusta Region

15 April 2009

The Regional Municipalities and Water Resources Ministry is currently implementing a number of service projects in different wilayats of Al Wusta Region. The projects include a sanitary drainage network and treatment plant in Al Ebahat in the Wilayat of Haima. The capacity of the plant is around 450 cubic meters per day.

The project, which cost RO 1.575million, aims at ensuring better health services for citizens, as well as, protecting the soil and underground water resources against pollution. The project will serve about 120 houses, in addition to the administrative area in the Wilayat of Haima. The ministry is also implementing a number of lighting projects in Mahout.
